

MUKILARASU S

AI & Automation Engineer | Full-Stack Developer

github.com/Mukil630 leetcode.com/u/Mukil55 mukilarasu-s-333771302

Summary

Final-year B.Tech Information Technology student with hands-on experience in AI, automation, and full-stack development. Built production-ready freelance applications including AI-powered SaaS platforms, desktop applications, and automation tools. Passionate about Java development, AI systems, and building scalable real-world software.

Education

VSB Engineering College, Karur	2023 – 2027
B.Tech – Information Technology	CGPA: 7.9 / 10
Bharani Park Matric Hr. Sec. School, Karur	March 2023
Higher Secondary (Class XII) Percentage	69.33%

Projects

Botify – AI-Powered WhatsApp Bot SaaS (Freelance)

Developed a production-ready multi-tenant SaaS platform enabling businesses to deploy AI-powered WhatsApp bots. Built AI chat automation, appointment booking, subscription plans, and an admin dashboard.

SGC Billing – Desktop Invoice Application (Freelance)

Developed a desktop billing application using Electron and React for invoice creation, automated PDF generation with Puppeteer, and secure Google Drive integration using OAuth.

Personal AI Assistant (Jarvis) (Personal Project)

Developed a voice-controlled AI desktop assistant using Python with speech recognition, text-to-speech, and automation capabilities. Integrated APIs to enable natural conversations, web search, and system automation.

AI Billing Automation Bot (Freelance)

Developed an AI-powered billing automation system that extracts handwritten invoice data using Groq API and generates digital invoices through a Telegram bot. Automated customer matching, Cloudinary uploads.

Agentic AI Workflow Automation Platform

Developed a multi-agent AI system that autonomously plans, reasons, and executes complex workflows using LLMs and external tools.

Internships

Hero MotoCorp Ltd. — Research & Development Intern (1 Month)

Worked in the R&D division and gained practical exposure to automotive research, product development, and engineering workflows.

IBM — AI & Automation Weekend Internship (2026)

Completed Virtual internship covering AI fundamentals, automation concepts, and real-world applications of intelligent systems.

Skills

Java, Python, JavaScript, SQL • Flask, Node.js, React, Electron
PostgreSQL, MySQL • Git, GitHub, Railway, Postman

Certifications

- AI & Automation — Full Course Completion (2025)
- AI & ML Made Easy: From Basic to Advanced (2025) – Udemy
- Demystifying Networking – NPTEL (2025)
- Infosys Certified Java Programmer – Infosys (2024)
- AI Agents for Beginners – Simplilearn SkillUp (2026)
